Summary

Full Stack Developer (MERN) with practical experience building end-to-end web applications through academic and personal projects. Seeking an entry-level Software Engineer role to apply my technical skills and contribute to innovative products. Passionate about building AI-powered applications, scalable web solutions, and continuously learning emerging technologies.

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Redux Toolkit, Tailwind CSS, SCSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO

Database: MongoDB

AI: Generative AI, LangChain

Animations: GSAP, Framer Motion

Developer Tools: Git, GitHub, Postman, VS Code, Render, Vercel

Projects

Perplexity AI Clone

[Live](#)

Tech Stack: React.js — Tailwind CSS — Redux Toolkit — Node.js — Express.js — MongoDB — Socket.IO — JWT — LangChain — Gemini API — Mistral API

- Developed a full-stack AI-powered chat application using React.js, Node.js, Express.js, and MongoDB with secure JWT authentication and persistent chat history.
- Integrated Gemini API, Mistral API, and LangChain to generate context-aware AI responses with Markdown rendering for an enhanced chat experience.
- Implemented support for multiple AI models, allowing users to switch between Gemini and Mistral for generating responses.
- Designed RESTful APIs for authentication, chat management, and message storage while managing application state efficiently using Redux Toolkit.
- Built a multimodal search feature that enables users to upload images and retrieve context-aware AI responses based on image content and user queries.
- Built a responsive interface with Tailwind CSS and implemented real-time communication using Socket.IO, supporting both desktop and mobile devices with light and dark mode.

Moodify

[Live](#)

Tech Stack: React.js — SCSS — Node.js — Express.js — MongoDB — MediaPipe — JWT

- Developed a full-stack web application that recommends music based on users' facial expressions using the MERN stack.
- Integrated MediaPipe to detect facial expressions in real time and identify users' emotions through webcam input.
- Implemented secure JWT authentication and designed RESTful APIs for user management and application functionality.
- Built a responsive and intuitive user interface with SCSS, ensuring a seamless experience across desktop and mobile devices.
- Stored user information and application data in MongoDB while managing backend services using Node.js and Express.js.

Education

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV)

2026

Bachelor of Technology in Computer Science and Data Science

Bhopal, Madhya Pradesh

Certifications

- **Full Stack Web Development (MERN)** – Sheryians Coding School
